

Project Report: Minimalistic Portfolio

Stepan Nikonov

July 1, 2024

1 Introduction

The goal of this project is to create a simple portfolio website using HTML, CSS, and GitHub Pages. This portfolio showcases personal projects, skills, and experiences.

2 Portfolio Structure and GitHub Repository

The portfolio includes several sections:

- Home: Introduction and navigation.
- About: Personal information and skills.
- Projects: Display recent projects.
- Contact: Contact details.

The GitHub repository (<https://github.com/stepannikonov/stepannikonov.github.io>) holds all the files. It's organized to keep content, style, and functions clear and easy to manage.

3 Design Decisions

The design focuses on simplicity:

- Colors: Used simple colors for a clean look.
- Text: Chose easy-to-read fonts.
- Layout: Made sure it works well on different devices.

4 Tools and Technologies Used

I used basic tools and technologies:

- HTML: Created the structure.
- CSS: Styled the website.
- GitHub Pages: Hosted the website.
- Git: Managed changes to the project.

5 Reflection and Future Improvements

The portfolio is simple and works on different devices. Improvements could include:

- Adding more details about each project.
- Making forms easier to use.
- Making the site more accessible.

6 Conclusion

Creating this portfolio taught me how to use basic web technologies effectively. It helps me show my work to potential employers or collaborators.
